

Exclusive: 'Two Worlds' Unite

Raelene Byrne and Jeremy Donovan

Jeremy Donovan and Raelene Byrne, under the banner of TWO WORLDS, are excited to announce the next stage of their journey in the form of a two day event. This collaboration will benefit participants as we experience and embrace the profound changes that are presenting to us all in every part of our lives.

We all know that when something changes in our lives and world, whether we consciously choose it, or it is thrust upon us, that all other parts of our lives are affected. Some call it the butterfly effect, others the ripple effect, still others say it is a shift in vibration. It doesn't matter what the terminology is, the bottom line is that as change sweeps into our lives, we can get confronted with blocks, obstacles, hurdles, confusion and questions.

Here in Australia, we have some remarkable people who hold much expertise and they go about their lives offering assistance and knowledge in their areas of speciality. To gather some of them under one roof for two days of sharing, experiencing, and gifting you with the tools to shift through the challenges of change in all areas of life, will be a time of profound wisdom for all who participate. We are bringing together some very powerful and inspiring people to offer their knowledge, information, skills and experience to help us all move through those obstacles with ease and grace.

"The speakers we have invited come from two worlds. This is not a spiritual event, but one that is filled with spirit. The speakers bring the spirit of their passion, wisdom, teachings, skills, purpose to these days as gifts which will enable each participant the ability to transcend the

changes all around with confidence and clarity. The philosophy of 'Two Worlds', is there is a point of balance in all things," says Raelene.

We live in a world of duality and polarity, and it is up to each of us to find that point of balance that serves our lives and learnings. In the time Jeremy and Raelene have worked together, the meaning of Two Worlds has been apparent. They are both from different worlds, yet they have found a common place where they meet, one of heart based truth, community building, earth wisdom, respect for the sacredness in life and a passion to guide others to open up to, and become the unlimited beings that we have the birth right to be. They have found the point of balance between the differences, where ancient and universal teachings unite, a place where they can stand alongside each other, totally connected, yet still owning their own selves.

The two day event to be held in June will include eight presenters: Dymphna Boholt, Lucy Cavendish, Justin Moikeha Asar, Rachael Bermingham, Like Chocolate for Women, along with Jeremy and Raelene.

There will also be a Sacred Ceremony on Saturday evening and a meditation to conclude the weekend where you will have the opportunity to integrate all the information, experiences and insights and anchor them in so you will be able to utilise them in your daily life.

The presenters will speak from the areas of life that get challenged with change: money, health, self-care, healing, ancient wisdom in modern times, goal setting, beliefs, mind matters, and more.

Each day you will be nourished with buffet lunches, beautiful morning and afternoon teas while surrounded by the beauty of the grounds and natural setting on the Sunshine Coast.

This is only the beginning and we invite you to be a part of this adventure that we are all living called 'life' and to face it with the tools, skills, and information that this event will bring into your own world.
